### **Reliability and Test Condition**

Item	Performance	Test Condition			
Soldering and Mou	nting				
Soldering	Mildly activated rosin fluxes are preferred. JANTEK terminations are suitable for all wave and re-flow soldering systems. If hand soldering cannot be avoided, the preferred technique is the utilization of hot air soldering tools.				
Lead Free Solder re-flow:	Recommended temperature profiles for re-flow soldering in Figure 1.				
Soldering Iron:	Products attachment with a soldering iron is discouraged due to the inherent process control limitations. If a soldering iron must be employed the following precautions are recommended. for Iron Soldering in Figure 2.  Note:  • Preheat circuit and products to 150°C  • Never contact the ceramic with the iron tip  • Use a 20 watt soldering iron with tip diameter of 1.0mm  • 355°C tip temperature (max)  • 1.0mm tip diameter (max)  • Limit soldering time to 4~5 sec
